

Established in 2013 as the first cloud mining provider, CEX.IO has developed into a Bitcoin exchange. CEX.IO offers two main services: easy buy/sell of Bitcoins via simplified interface and Bitcoin trading for professionals. The company operates globally, providing services in 99% of countries, and 25 states of USA. You can buy and sell both Bitcoin and Ethereum with CEX.IO for multiple fiat currencies: USD, EUR, GBP and RUB

Deposits are available via debit and credit cards (both physical and virtual), wire transfer, SEPA and Skrill. Card payments have become faster and easier with the development of the platform and you can also instantly withdraw your funds to a payment card.

CEX.IO provides cross-platform trading via website, mobile application, WebSocket and REST API. FIX API is an option for institutional traders. Advanced order-matching algorithms are backed by unique trade engine. They guarantee fast order execution and access to their order book for top currency pairs on Bitcoin market. The exchange charges 0.2% fee on all trade operations. Special conditions for high-volume traders are negotiable. Currently, the platform allows to place limit and market orders. CEX.IO offers margin trading with 1:2 and 1:3 leverage trading for several pairs

Throughout the history of the company, none of the users ever experienced account funds theft, which is backed by system and user account security, safe cold cryptocurrency storage, financial viability and profound legal compliance. CEX.IO is a registered Money Services Business in FinCEN (USA) and has obtained a PCI DSS certificate that allows the company to store, process and transmit cardholder's data. Apart from that, the company also provides a seamless instant crypto purchase option for its users, [CEX.Direct](#).

CEX.IO has an Affiliate Program which allows getting 30% of the fee from all exchange operations of referred users.
